Appomattox is going through some real changes in so far as her agriculture is concerned. For example: in 1970 we harvested 6400 acres of corn -- last year the harvested acres dropped to 4900 acres. In 1962 we grew 650 acres of alfalfa -- this year we may harvest 75 acres. In 1967 we harvested 4000 acres of wheat, but in 1971 the figure dropped to 2850 acres. The allotment of dark tobacco is 1605 acres -- in 1970 we harvested 624 acres and last year it dropped to 584 acres or 35% of the county's allotment.

Take a look at livestock: in 1959 there were 7,800 head of cattle. By 1970 the number had grown to 9000 and the proportion of beef cattle was growing. In 1970 we had 300 sheep; today we may have 50 head. In 1966 there were 1200 head of hogs and pigs, but by 1970 the number had grown to 2200. Hog prices and the availability of corn strongly influence hog numbers.

The loss in crops harvested is being converted to grass for livestock. Thus, this is the trend of agriculture as it moves into the '70's.

* * *

It's interesting to watch certain varieties grow in popularity. In flue-cured tobacco, for example, 47% of the 1972 Virginia crop will be planted to Coker 319 and so it goes with other crops.

* * *

Now's the time to spray pastures for control of many weeds. 2, 4-D is the least cost material and will control at least 30 different weeds. But you still need, to know which weed you have in your pasture and which herbicide is most effective for your situation.

Ask for "Weed Control In Pastures" for more information.

* * *

More than 1600 head of calves are expected to be sold today at the spring feeder cattle sale in Lynchburg. Consignors from Appomattox are Dancy McCraw, Ralph Reynolds and C. J. May.

* * *

Lawns seem to pick up weeds. Some of the common ones are wild garlic (sometimes called wild onion), dandelion, plankton and chickweed. The first three can be easily controlled with 2, 4-D. Chickweed responds best to silvex.

Reminder Given On Farm Loans

Spring planting is a good time to look ahead to harvest time storage needs for grains and other storable crops, according to J. P. Alvis, Jr., Chairman of the Appomattox County Agricultural Stabilization and Conservation (ASC) Committee.

He reminded farmers that the loan program for farm storage and drying equipment was recently liberalized, with the loan interest rate being lowered to 5.52 percent.

Storage facility loans may be made on the basis of two year's production of a farmer's crops which are eligible for price - support loans. The maximum loan or outstanding aggregate balance is now $35,000.

Mr. Alvis said eligible producers may obtain loans to buy needed drying equipment as well as to build new structures, pointing out that the last few years have been development of many new harvesting, conditioning and storage techniques for farm crops.

Full details on farm storage and drying equipment loans are available at the Appomattox County ASCS Office.

Delegates To Attend Session

Pastor Rufus B. McDannell and Mr. and Mrs. Walter Young and Mrs. McDannel will represent the Appomattox Church at the 25th Biennial Session of the Potomac Conference of Adventist to be held in New Market, Va., Sun., April 16. The meeting will convene at 9:45 a.m. in Zirkle Hall on the campus of Shenandoah Valley Academy.

The area delegates are part of 466 chosen by Adventist congregations in the District of Columbia, the Commonwealth of Virginia (west of the Chesapeake Bay) and the counties of Montgomery and Prince George in Maryland. Also in attendance will be a number of delegates-at-large.

Crew Sandefur, president of the Columbia Union Conference of Adventists in Takoma Park, Md., will preside at the session. Eight conferences from the states of Delaware, Maryland, New Jersey, Ohio, Pennsylvania, Virginia, West Virginia, and the District make up the Columbia Union territory.

Fenton E. Froom, president of the Potomac Conference of Adventists and Emil M. Hagele, secretary - treasurer, and departmental secretaries will present reports for the 1970-71 Biennial. Reports will also be given by the Conference Corporation, Shenandoah Valley Academy in New Market, and Takoma Park Academy in Takoma Park, Md.

Conference officers, departmental leaders, and a conference committee will be elected at the Sunday meeting.

The Potomac Conference is one of 53 Adventist Conferences in the United States.

"Emily Burke's prize - winning painting, "Fruit" is on display in Lynchburg until April 27, but here are other paintings" she has completed recently, including the one of the ship, done in 40 minutes during a Woman's Club Demonstration. Her "best of show" painting is at the Fine Arts Center, Lynchburg.

Painting Wins 'Best In Show'

Emily Burke (Mrs. W. W.), of Appomattox, submitted a "tissue paper" painting in the Lynchburg Area Art Show and her work of art, entitled "Fruit" has been judged 'best in show'' in competition with amateur, semi - professional and professional artists within a 125 mile radius of Lynchburg.

The award, highest in the show, includes a cash prize of $100 and carries with it considerable prestige among area artists.

Mrs. Burke's painting, along with others, is on display through April 27 at the Lynchburg Fine Arts Center.

The artists said she thought she "might be sticking her neck out" by even daring to submit a painting in the rather new medium of 'tissue paper painting'' and almost gave up the idea when she considered the formidable competition.

However, she selected the first painting she completed among her "tissue paper paintings'' and was surprised and very much pleased to have it given top award over oil paintings, acrylics, watercolors, prints, drawings and sculpture.

Mrs. Burke, well known banker and businesswoman, retired a few years ago, along with Mr. Burke, from the Bank of Appomattox before its changeover to Fidelity National Bank, Appomattox. Since that time she has become very much involved with arts and crafts and has completed a number of paintings in oil plus the tissue paper paintings, some of which are on display in Appomattox business places and offices.

Tissue paper painting technique involves tearing off small pieces of tissue paper in various colors, then gluing them to masonite board, adding layer upon layer to achieve a three-dimensional effect. There is no sketching involved, says Mrs. Burke, and the full beauty of the work is only revealed as the paper "bleeds" colors in a blend of shades.

Mrs. Burke has won blue ribbons in local Woman's Club competition and also in district competition in the Alice Kyle District, Federation of Woman's Clubs.

She paints for family and friends, refinishes antique trunks and has mastered the rather complicated craft of chair "caning." For this busy artist, the days don't seem to be long enough. Of all the painting media, however, she says that "tissue paper painting' is among the least expensive and most satisfying.
